Anthony Cassella

Open this heurio

Note

Check the design specs inside assets/template-designs - the product photo needs to take up more space and the expandable feature buttons need to move up and ope downward - in general the cards have too much negative space in the default state which kind of makes the expandable feature seem pointless

Note

Nacho needs a fixed size - he is currently too vertically smooshed - I think take him out of the clipping mask circle and give him some animation. the objects /stars that are part of his photo have individual versions inside motifs - sparkle and starburst - add a dozen (6 of each) in varying sizes and give them a swinkle animation and a reaction to mouse or skroll - twinkle + a subtle yet dramatic scroll animation that reveals Nacho

10

Anthony Cassella

Open this heurio

Note

lets make these photos larger and give them a viewport in the style of the product cards with a back pattern and the expandable feature that shows off the photo in a larger view with product info (not buyer details) - the cards should also scroll automatically in vertically and slowly- stopping when presses
